new FILLING LINE

Discover the success story that
Cartobol achieved for **Château
Sainte Roseline**

FRESH NEW **AUTOMATIC LINE** FOR CHÂTEAU SAINTE ROSELINE

Château Sainte Roseline successfully installed a new automated production line in record time, without disrupting operations. Thanks to great teamwork, the new system was smoothly installed, making the process faster and more efficient while keeping the winery's high standards.

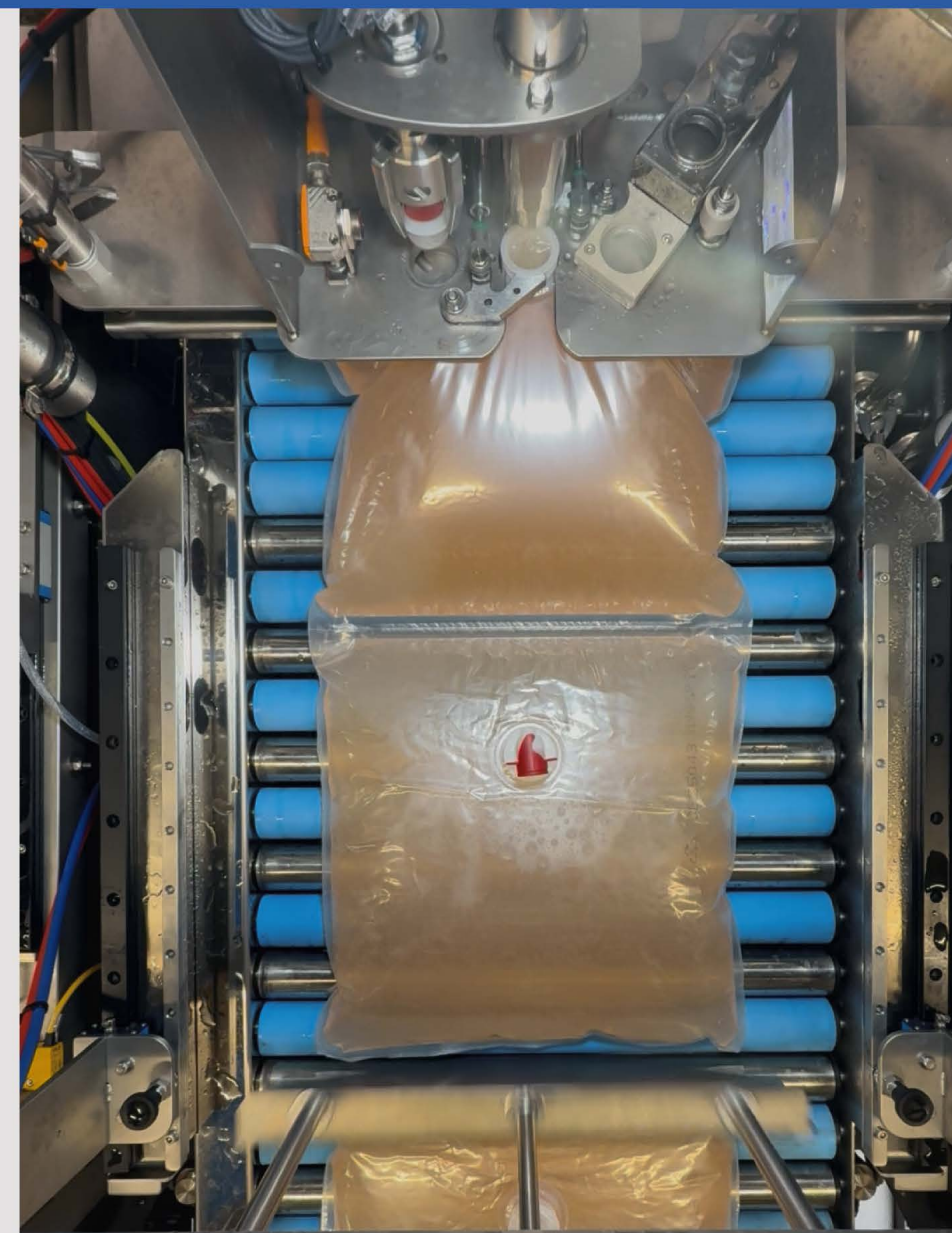

BAG-IN-BOX technology

Our films, fitments, and fillers are engineered to work in perfect harmony, creating a complete packaging system that protects your wine from oxygen and light. Our bag-in-box solutions help preserve the freshness of your wines and spirits for longer, allowing your customers to enjoy them just as you intended.

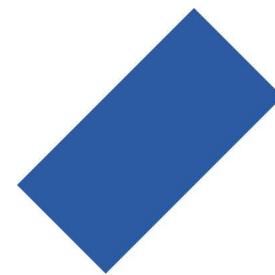

CHALLENGE

Château Sainte Roseline faced a clear challenge: to produce more boxes, faster, with greater precision, automation, and safety, to meet market demand. Thanks to the great work of Ignasi Ginjaume, Robert Cabañero, and José Luís Sánchez, the new system was installed and up and running in just 24 hours. The line was integrated without stopping production, boosting efficiency while keeping the high quality the estate is known for.
